

# DRY FOREST EXPO

EXHIBITION SPACE ENGINEERING

# LET US COOPERATE TO ACHIEVE YOUR GOALS

At **Dry Forest Expo** we are creating projects that thanks to the deep understanding of our customer's needs translate directly onto their consumers providing unforgettable experience. We operate across European Union.

We offer end to end services around exhibition booth design and build. We deliver our services based on our own modern frame system **Aluvision/Bematrix** as well as based on more traditional methods such as individual builds out of **MDF** and other materials. At the same time we produce any type of suspensions, prints or show case elements

## Our offer includes:

- booth project and 3D visualization
- complete build of the designed project
- complete logistics around the event
- electrical and water installation
- modern furnishings
- graphical design and print
- sound systems and multimedia
- flower arrangements and other elements of space arrangements
- creation of VIP zones and afterparties

# OUR PROCESS

1 Initial contact

2 Discussion over the brief

3 3D project preparation

4 Signing a deal

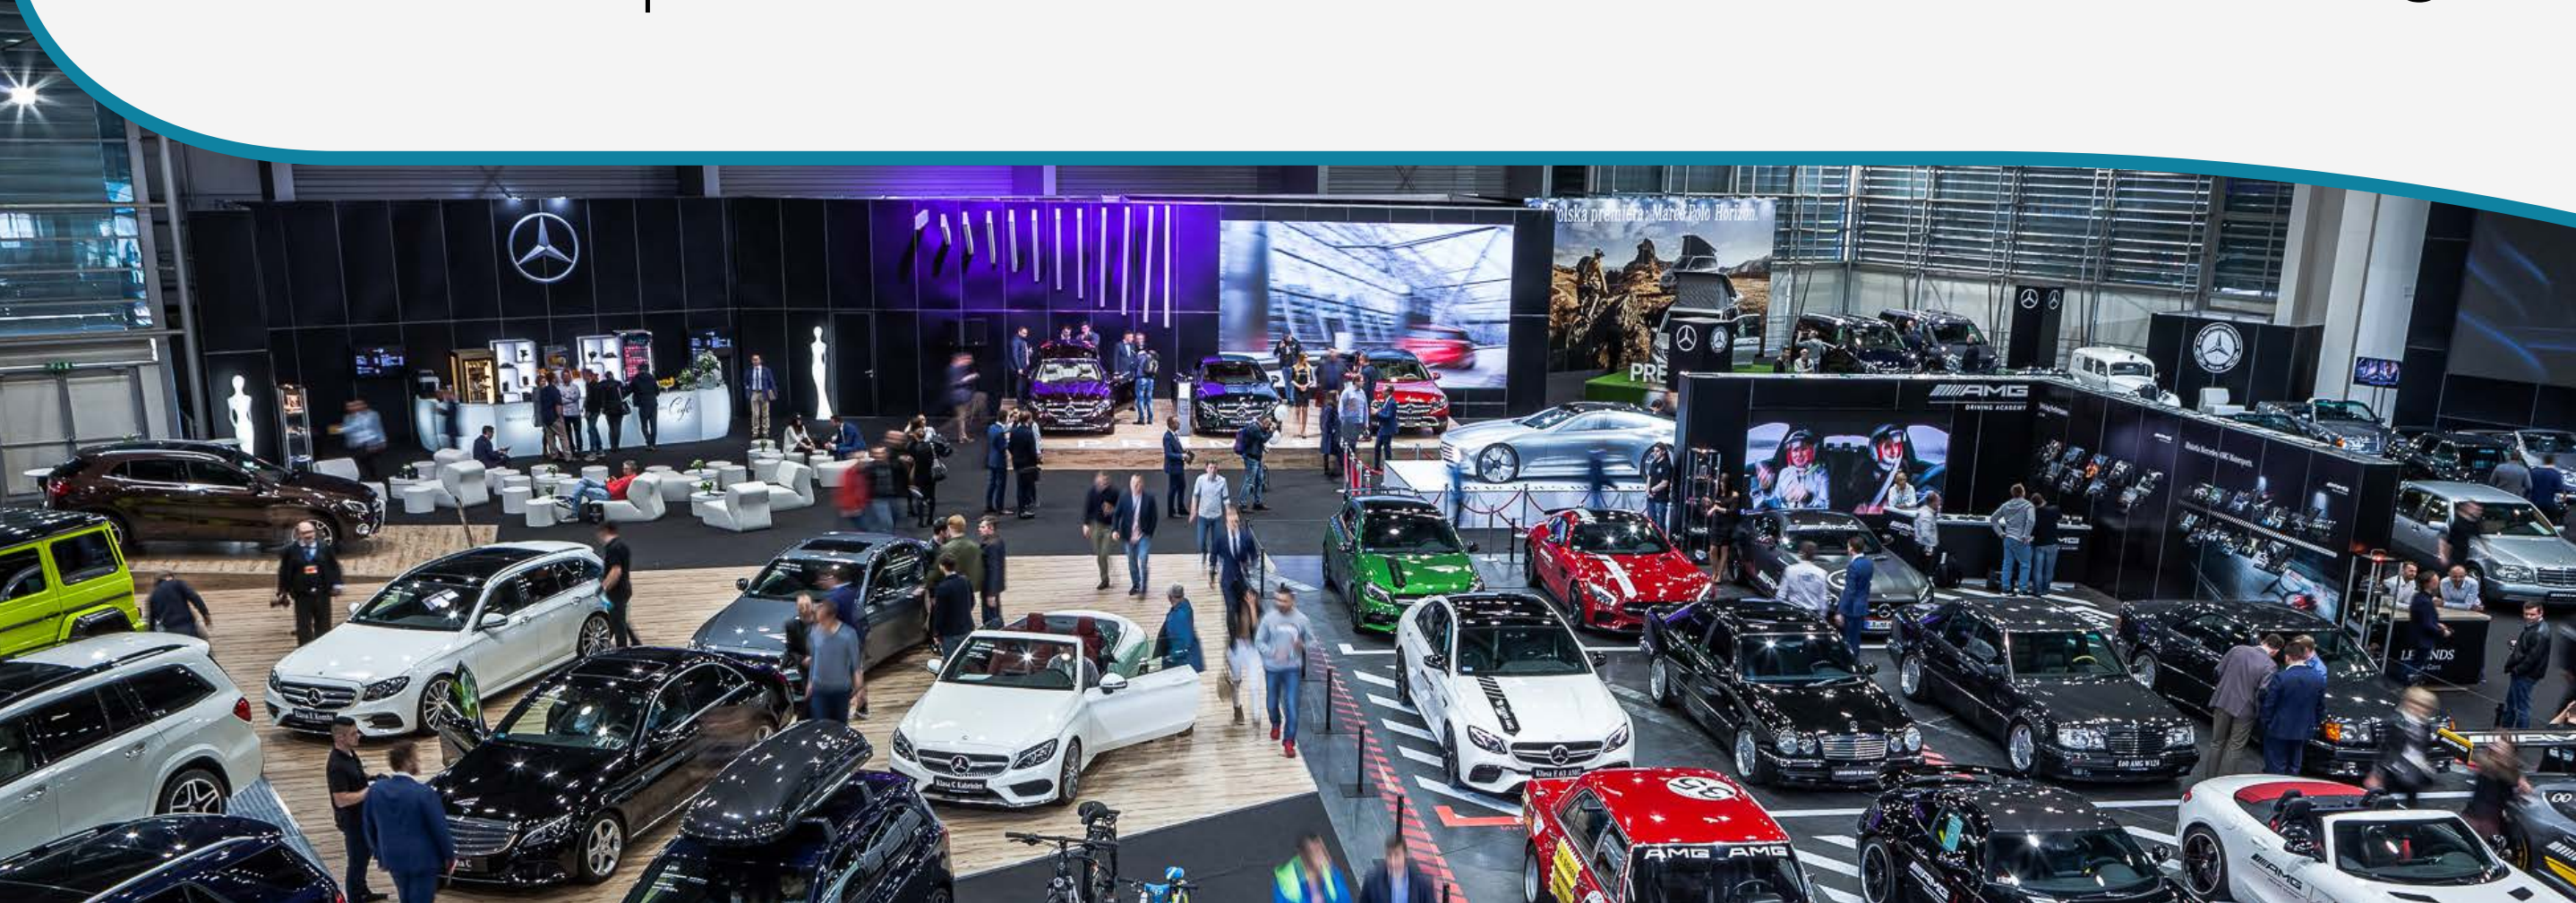

6 Onsite stand production

5 Preparation of the materials and logistics

7 Satisfaction

# WHAT DO WE WORK ON

frame system with **standardized dimensions** and **connection method**.

**Invisible** frame structure allows your visual communication to take full space .

Our frames are covered with the filing that can be attached **in two ways**:

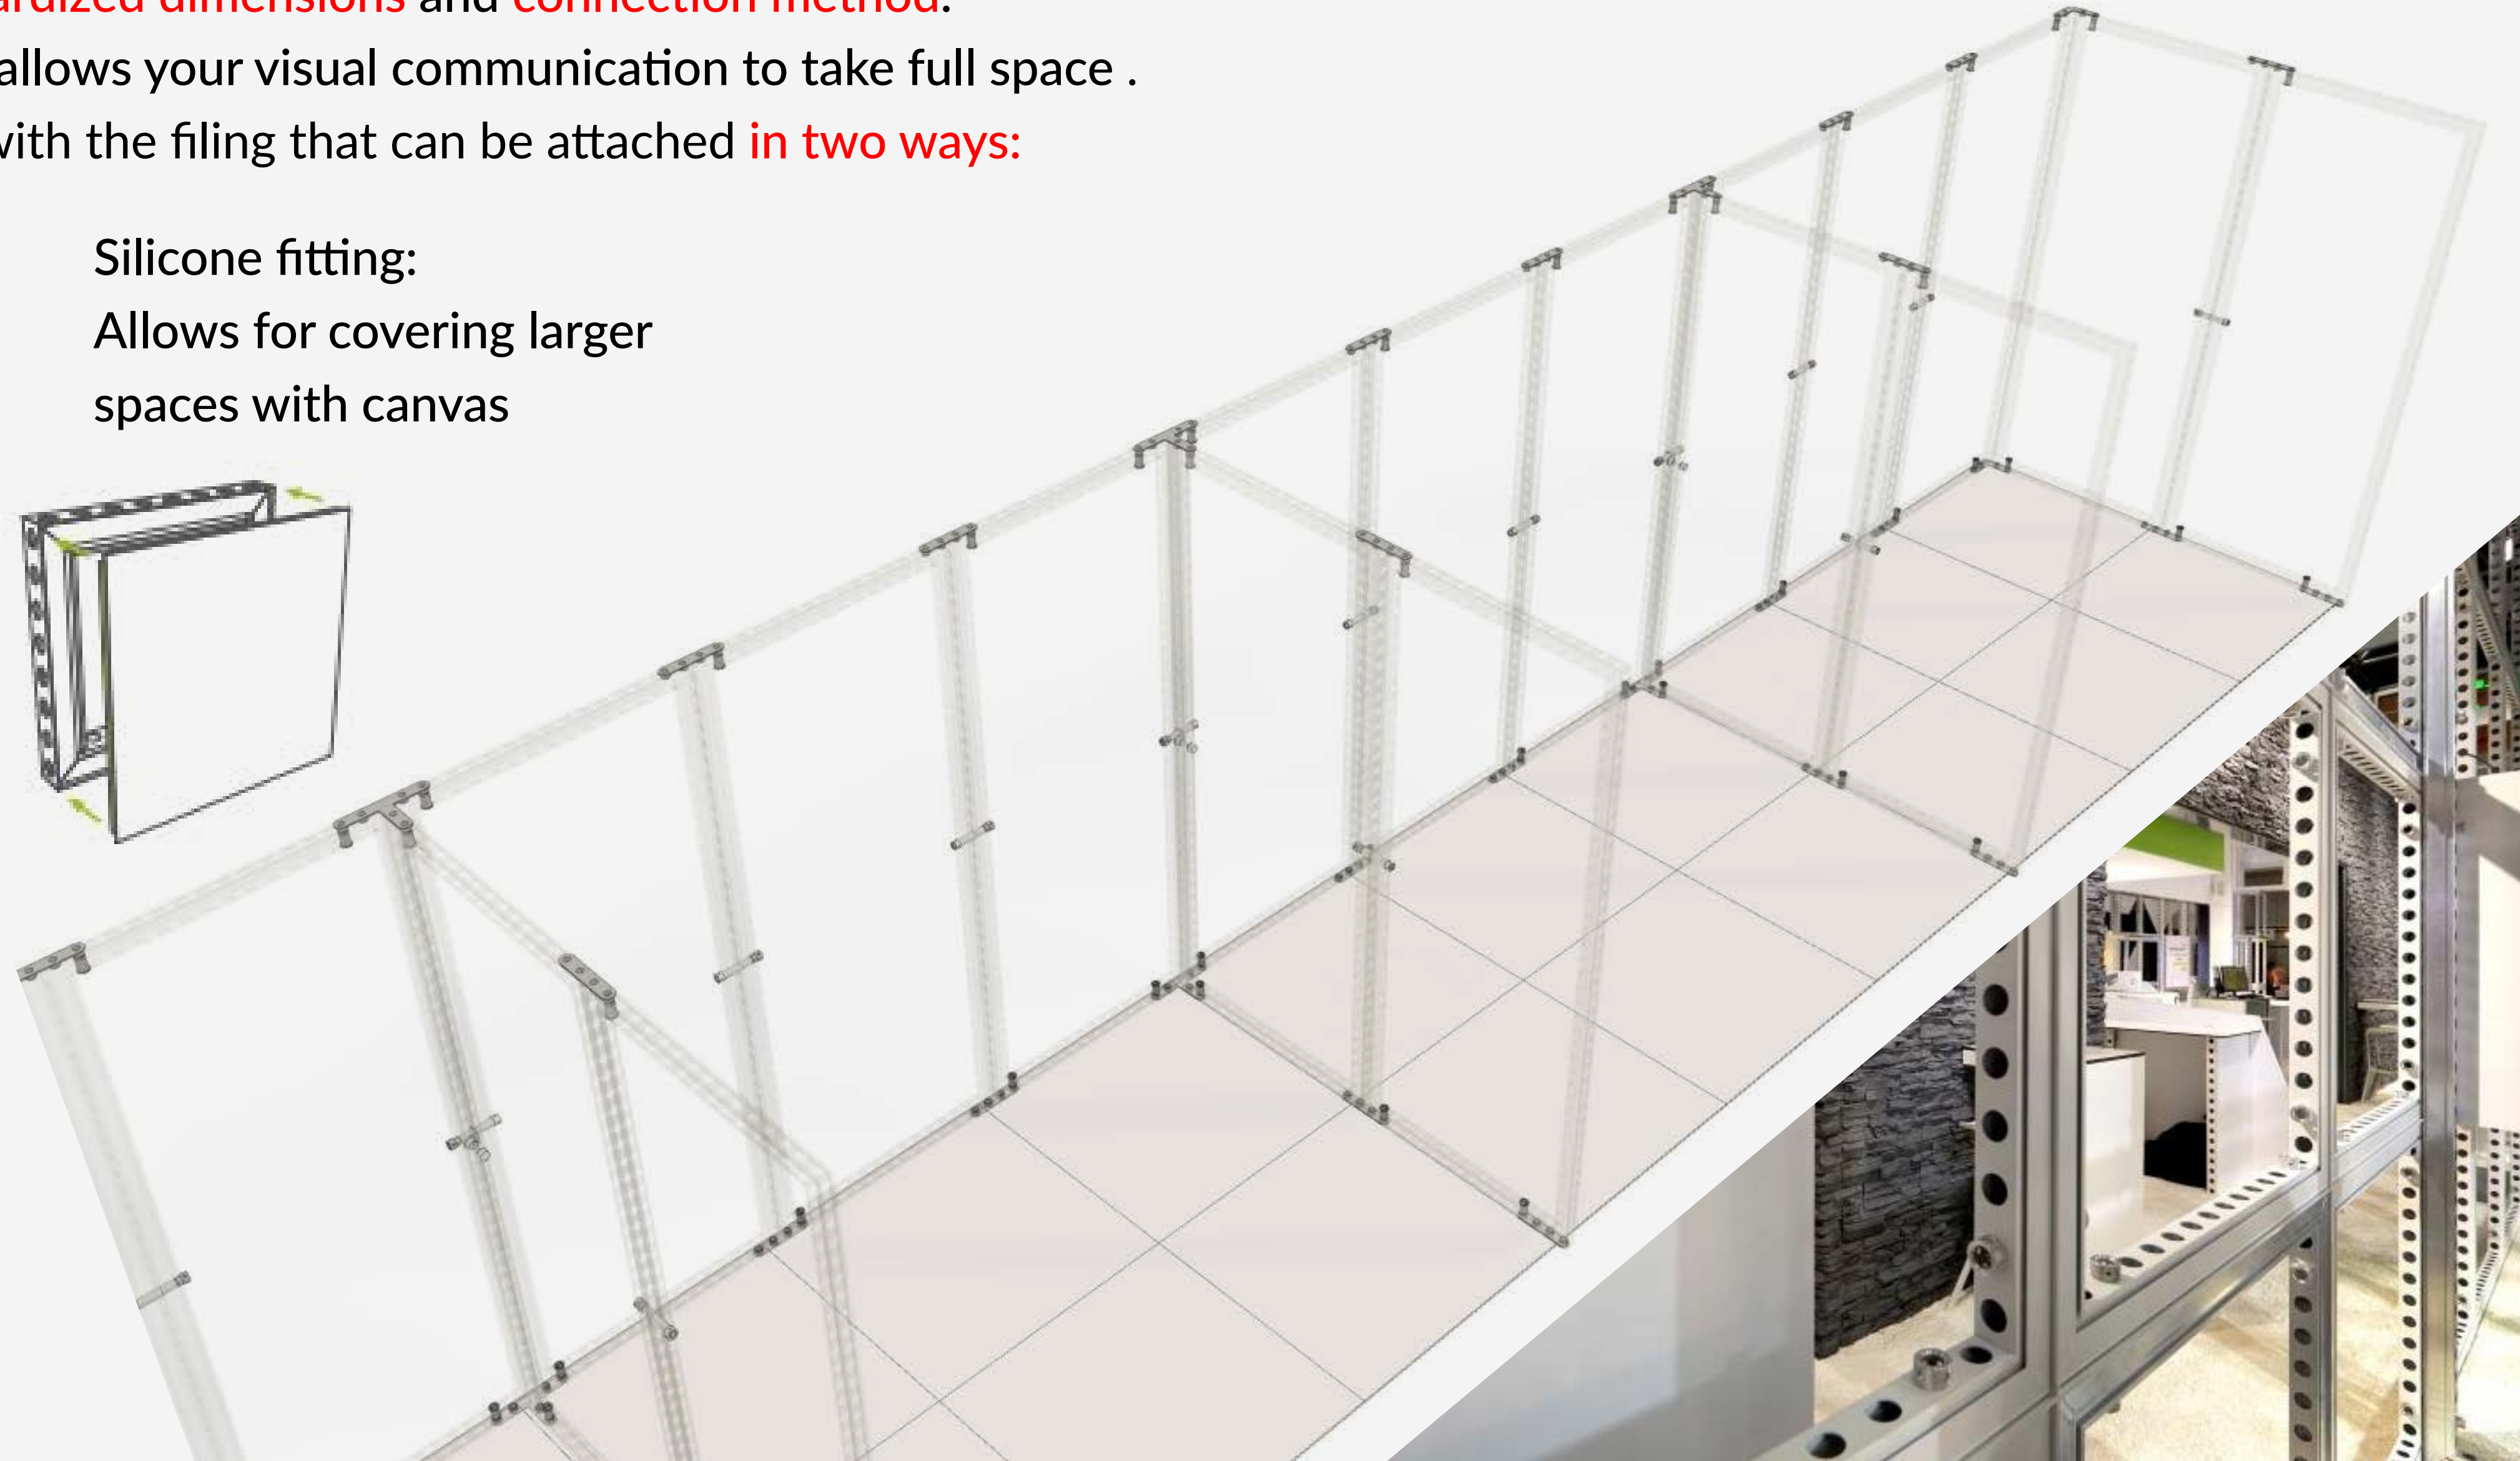

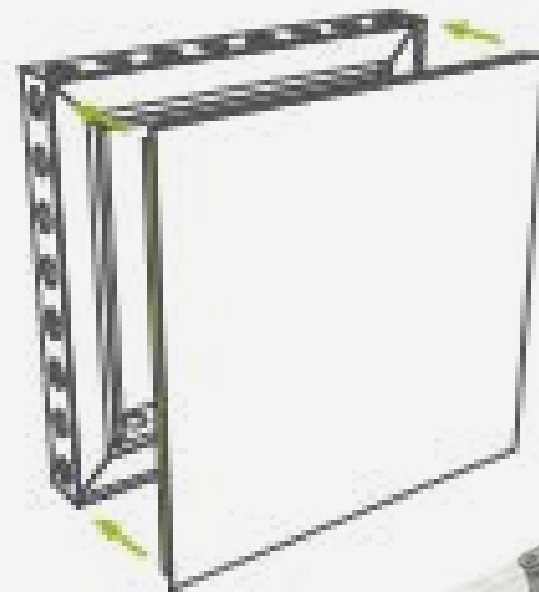

Velcro:

PCV modules, Dibond,  
wood, etc

Silicone fitting:

Allows for covering larger  
spaces with canvas
